

MALE RESPONSE™

Virility Complex

Healthy male response is more complicated than many people realize. There are a range of interrelated body systems that affect male sexual function. MALE RESPONSE helps support balance in these systems: hormonal function, energy generation, circulation, the brain and nervous system, and the prostate gland.

	Hormonal Function	Energy Generation	Circulation	Brain & Nervous System: Libido	Prostate Gland
ACTION	<p>Hormones are chemicals released into the bloodstream that control numerous body functions. Testosterone is the most important of the male sex hormones. Produced by the testes, it is responsible for the development and maintenance of the male sex organs, contributes greatly to the level of sexual desire, and helps regulate energy and mood.</p>	<p>Fatigue and poor energy can take a toll on one's desire or capacity for sexual intimacy. This formula combines a variety of herbs and nutrients to help revitalize energy levels, nourish the adrenals, and invigorate the sexual response.</p>	<p>Proper circulation of blood is vital for the male sexual response. This formula contains several herbs traditionally used for their effect on blood flow. For example, yohimbine, an alkaloid from the bark of a native African tree, reportedly stimulates selected portions of the nervous system and increases blood flow to enhance the sexual response.</p>	<p>Stress and emotions often affect sexual desire and libido. In addition to providing supportive nutrients for the healthy functioning of the nervous system, this formula contains herbs traditionally known for their aphrodisiac and rejuvenating properties.</p>	<p>A healthy reproductive system is an important part of a balanced approach to sexual function. Specific ingredients such as zinc support male reproductive health and are essential for the proper functioning of the prostate gland. Vitamin E, an antioxidant, supports normal prostate tissue functioning and sperm production.</p>
CONTENT	<p>Nettle, Panax Ginseng, Saw Palmetto, Tribulus, Zinc, Vitamin B-5</p>	<p>Ashwagandha, Damiana, Maca, Panax Ginseng, Sarsaparilla, Siberian Ginseng, Zinc, Vitamins B-5 & B-6</p>	<p>Ginger, Ginkgo Biloba, Panax Ginseng, Yohimbe, Vitamin E</p>	<p>Ashwagandha, Avena Sativa (Oats), Damiana, Muira Puama, Panax Ginseng, Sarsaparilla, Tribulus, Yohimbe, Copper, Vitamins B-5 & B-6</p>	<p>Avena Sativa (Oats), Damiana, Nettle, Saw Palmetto, Tribulus, Selenium, Zinc, Vitamin E</p>
